

Business Courses

For Mac or PC

Course Aims

FileMaker Pro is a powerful data management programme that provides the ease of use required by many people who are new to databases.

This two day course is designed to help you mount your database into your internet site.

The use of step-by-step, task specific assignments will enable you to quickly acquire the skills and techniques needed.

Target Audience

People who want to make their database accessible to a wider audience than can be achieved using FileMaker Server or who would like aspects of their database to be available to people using their web site.

Assumed Knowledge

Participants on this course should have a reasonable understanding of FileMaker Pro and some knowledge of HTML.
